

Android Projects

I. ANDROID based CRYPTOGRAPHY

1. Variable Data Hiding in Uncrated with Dispensed Source cryptograph. **(IEEE 2016).**
2. Revisiting Attribute-Based inscription with testable Outsourced clarification. **(IEEE 2016).**

II. ANDROID based DATA MINING

1. Functional almost k Nearest Neighbor problem with venue and suspicion solitude. **(IEEE 2016).**
2. Scattered disguised partition nearing with scammer obstacle based on QR Code. **(IEEE 2016).**
3. Spotting pointer spelled Words from Sign Language Video by Temporally permanent received composing separation. **(IEEE 2016).**
4. Two equivalent QR code for particular dispatch distribution and certificate authentication. **(IEEE 2016).**
5. Effective Actual-Time Healthcare Auditing and capturing integral using GSM/GPS Technologies. **(IEEE 2016).**

ANDROID Projects

IEEE 2016

III. *ANDROID based SURVEILLANCE*

1. Combination of fitted reversed Investigation Typical and several Attribution Travelling for observing and Tracking Humans. **(IEEE 2016).**
2. Structure-Processing synopsis of impelling substance in Surveillance Videos. **(IEEE 2016).**
3. A Performance System of an Extreme Ambulance Using register Traffic deflecting. **(IEEE 2016).**
4. Semantic SLAM: Using Habitat monument for autonomously trained Localization. **(IEEE 2016).**
5. Diverse Intention Tracking in Village Environments. **(IEEE 2016).**

IV. *ANDROID based CLOUD COMPUTING*

1. Generative Multi-Objective assignment registering in Cloud. **(IEEE 2016).**
2. Elevate administration and Throughput of VMs for precise assignment in a Cloud domain. **(IEEE 2016).**
3. Enabling Cloud Storage survey with testable Outsourcing of crucial Updates. **(IEEE 2016).**
4. Ancillary mould data quantities utilization in cloud circumstances **(IEEE 2016).**

#1 Shifa Arcade, Bharathi Nagar 1st Street, North Usman Road, T-Nagar, **Chennai – 600 017.**

#74 Kongu nagar, Ramanathapuram, Opp Alvernia School, **Coimbatore - 641 045.**

044 - 42124943 | 95000 88927 | 96001 14466 | info@uniqtechnologies.co.in

ANDROID Projects

IEEE 2016

V. *ANDROID based WEB SERVICES*

1. Construction and resolution of multi-mode figure caution using mode matching technique and changing algorithm. **(IEEE 2016).**

VI. *ANDROID based IMAGE PROCESSING*

1. Elevated sufficiency Versatile Data Hiding in Encrypted figure by Patch-Level inadequate delegation **(IEEE 2016).**

VII. *ANDROID based REAL TIME APPLICATION SYSTEMS*

1. A chart-Based Accession to Surveying the Performance of an Municipal Taxi Service System. **(IEEE 2016).**
2. Influential Vanquishing for Flying Ad Hoc Systems. **(IEEE 2016).**
3. Creating and Reasoning of Ward Patient Saving Progress on the Hospital Stage. **(IEEE 2016).**
4. A Real-Time Data Based Demand-Side authority theory in Smart Grid. **(IEEE 2016).**
